

YEULIAN

YLDP CODE SWITCH

Digital Rotary Switch

The code switch from YEULIAN Electronics boasts mature manufacturing techniques, enabling high-precision band switching that ensures signal stability and reliability. It can also switch quickly to meet the demands of high-speed data transmission. Additionally, the switch can withstand high-voltage input signals and has excellent capacitance and impedance matching capabilities.

The YLDP series has a robust and durable mechanism design with a fully enclosed structure, offering stability, reliability, oil resistance, and waterproofing advantages. Customers can customize the coding and segment number as needed, making I/O point configuration more convenient and meeting the diverse application needs.

YLDP CODE SWITCH

Features

CE

RoHS

IP65

Warranty

- Angle ranges: 13.85°, 0-25 positions.
- Four encoding types: Binary/Complement Binary/Gray Code/Complement Gray Code.
- High precision and fast switching, ensuring signal stability and reliability.
- Robust and durable mechanical design, with excellent capacitance and impedance matching characteristics.
- Support for connector and multiple knob options.
- Sealed design to reduce debris and dust ingress.
- Backstage segment settings, no need to disassemble components to change the number of segments.
- Suitable for unique functions such as magnification, feed rate, and mode.
- Over 200,000 cycles lifespan, 4 times more durable than same-spec products.
- CE/ROHS certified.
